Projects

flappy-bird

HTML, CSS, Javascript

- Implement game mechanics such as bird movement, obstacle generation, collision detection, and score tracking using JavaScript. Use event listeners to capture user inputs for controlling the bird.

https://github.com/khyati-ojha/flappy-bird-

Amazon Clone

HTML, CSS

- Using fonts and colors similar to Amazon's branding to create a cohesive look. Utilizing modern CSS techniques to structure and align elements on the page.

https://github.com/khyati-ojha/Amazon-Clone-using-HTML-CSS

Stone Paper Scissors

HTML, CSS, JS

- Implement game logic such as generating random choices for the computer, comparing choices, updating scores, and managing game flow using JavaScript and update the score of both computer and user on the screen.

Expense -Tracker

HTML, CSS, JS

- The Expense Tracker is a web application designed to help users manage their personal finances by tracking daily expenses. Built with HTML, CSS, and JavaScript, this project offers a user-friendly interface for adding, viewing, and managing expenses. The application provides a simple yet effective way to monitor spending habits and maintain financial health.
